

Mobility Work

**Next Gen CMMS &
1st Maintenance Social Network**

WHY MOBILITY WORK?

AN ANSWER TO THE MARKET'S REAL NEEDS

CLASSIC CMMS: ANALYSIS & CONSIDERATIONS

- ⚙️ They are costly and hard to implement within a company.
- ⚙️ They require a lot of time & resources to set up parameters and train users.
- ⚙️ Users consider them as “surveillance tool”, and do not take advantage of them.
- ⚙️ Their data quality and analysis tools do not enable decision-making.
- ⚙️ They do not enable two sites of a same group or two manufacturers working on the same equipment to communicate and share information.
- ⚙️ They are not user-friendly. Their ergonomics is very far from those of common apps everyone loves and uses in everyday life.

OUR SOLUTION TO THOSE NEEDS

MOBILITY WORK ENABLES YOU TO:

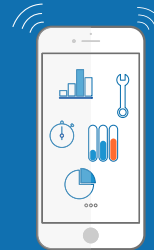

Easily manage your maintenance service with a simple, user-friendly and responsive tool:

- ⚙️ Access Mobility Work from anywhere, on any kind of device.
- ⚙️ Monitor the interventions that have been or are being performed in your company with the news feed.
- ⚙️ The calendar tool enables you to plan and follow the status of every intervention.

Make your technicians' daily activities and performance easier with:

- ⚙️ A simplified data entry process for their interventions.
- ⚙️ An easy access to the latest repairs thanks to the news feed and the mobile version.
- ⚙️ No time lost thanks to the document or spare parts quick search tool.

Analyze your maintenance-related data with our easy integrated Big Data tool, connectable to any other application (ERP & others):

No computing program or training required.

Join the first maintenance social network and communicate in real time with other manufacturers who share the same issues:

(share expertise, spare parts...)

EASILY REGISTER YOUR EQUIPMENT

CREATE YOUR EQUIPMENT

Thanks to the mobile version and the community's equipment catalog, you can easily create your equipment in less than a minute.

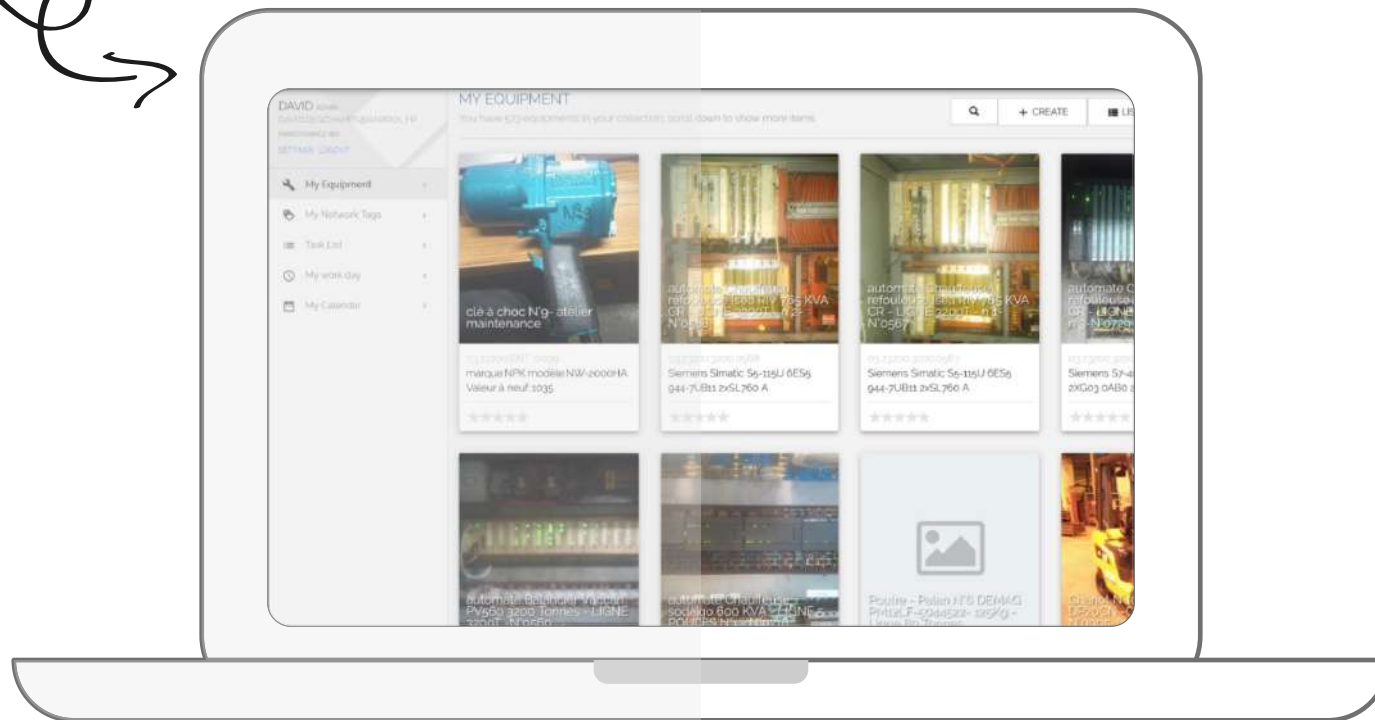

* Picture: 3d-printed spare part by Spartacus3D

EASILY MANAGE YOUR EQUIPMENT

VISUALIZE YOUR EQUIPMENT

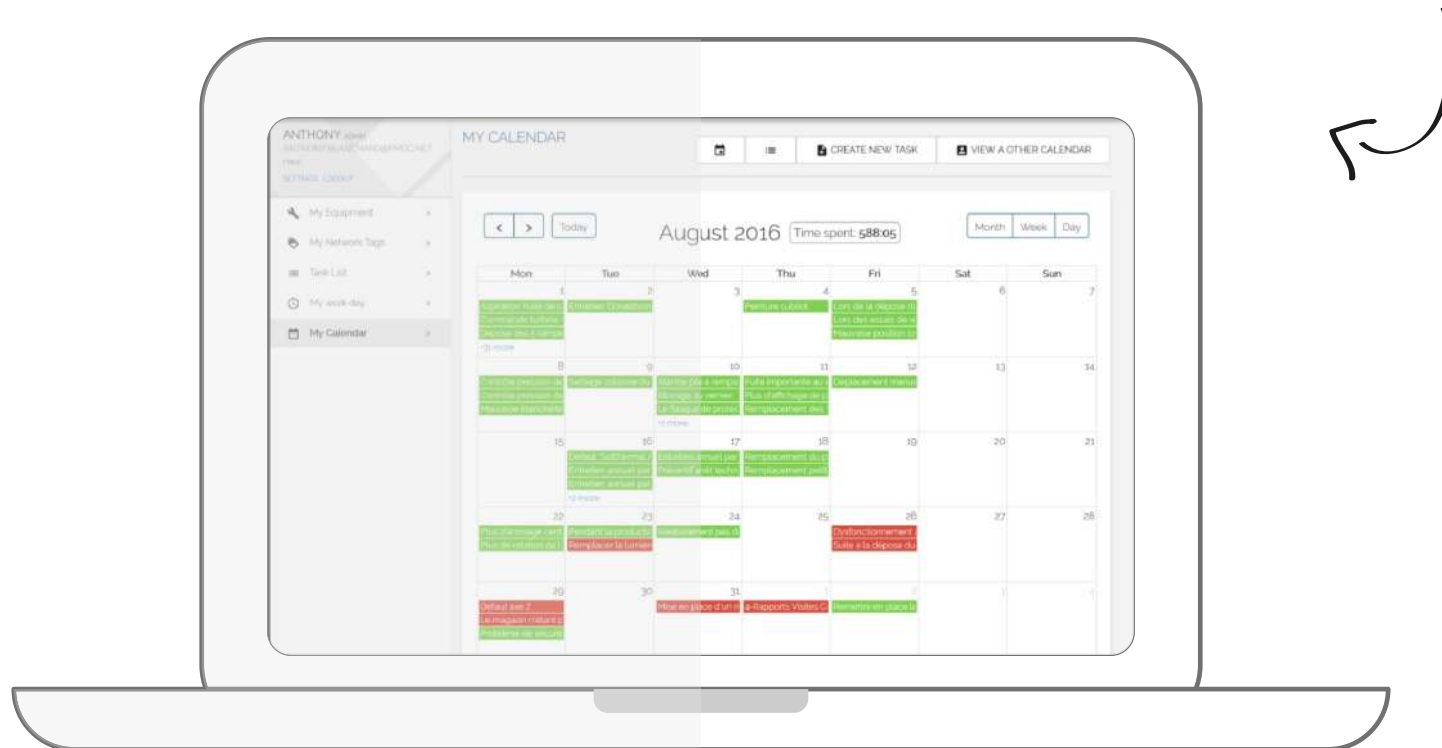

Easily find your equipment with the powerful quick search bar.

IMPROVE YOUR MAINTENANCE SCHEDULE

PLAN YOUR INTERVENTIONS

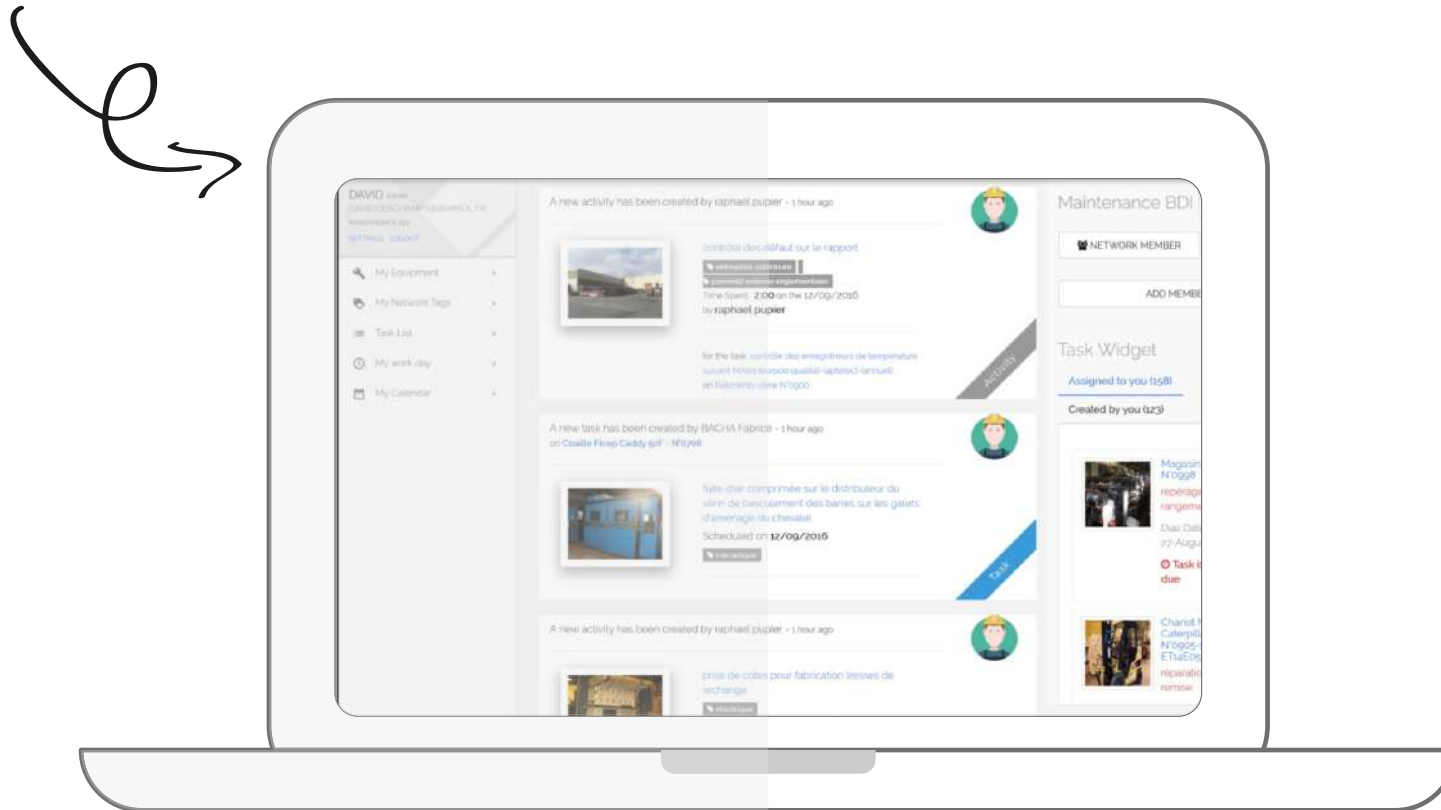

Improve your team management and monitor the operations.

ACCESS YOUR NEWS FEED

STAY INFORMED TO BE MORE EFFICIENT

Access your latest maintenance interventions, manufacturing requests, etc.

MANAGE YOUR DOCUMENTS

UPLOAD AND SEARCH YOUR DOCUMENTS

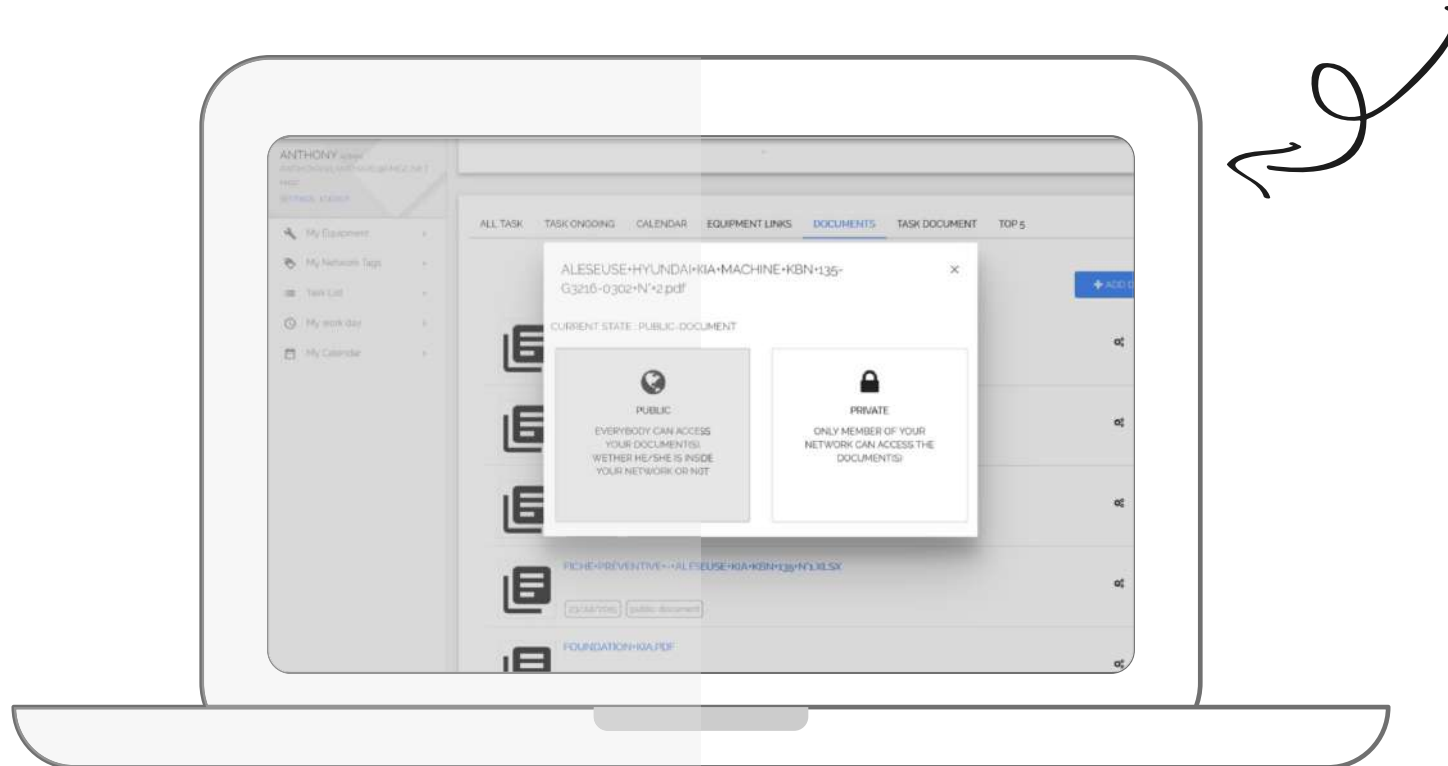

Easily access your electrical schemes, add plans, photos, videos, etc. to your equipment.

CONTROL THE PRIVACY OF YOUR DATA

PROTECT YOUR DATA

Configure the level of privacy of the information & decide whether you are willing to share it or not with the community.

ANALYZE YOUR DATA AND MAKE THE RIGHT DECISION

DISCOVER A NEW DIMENSION

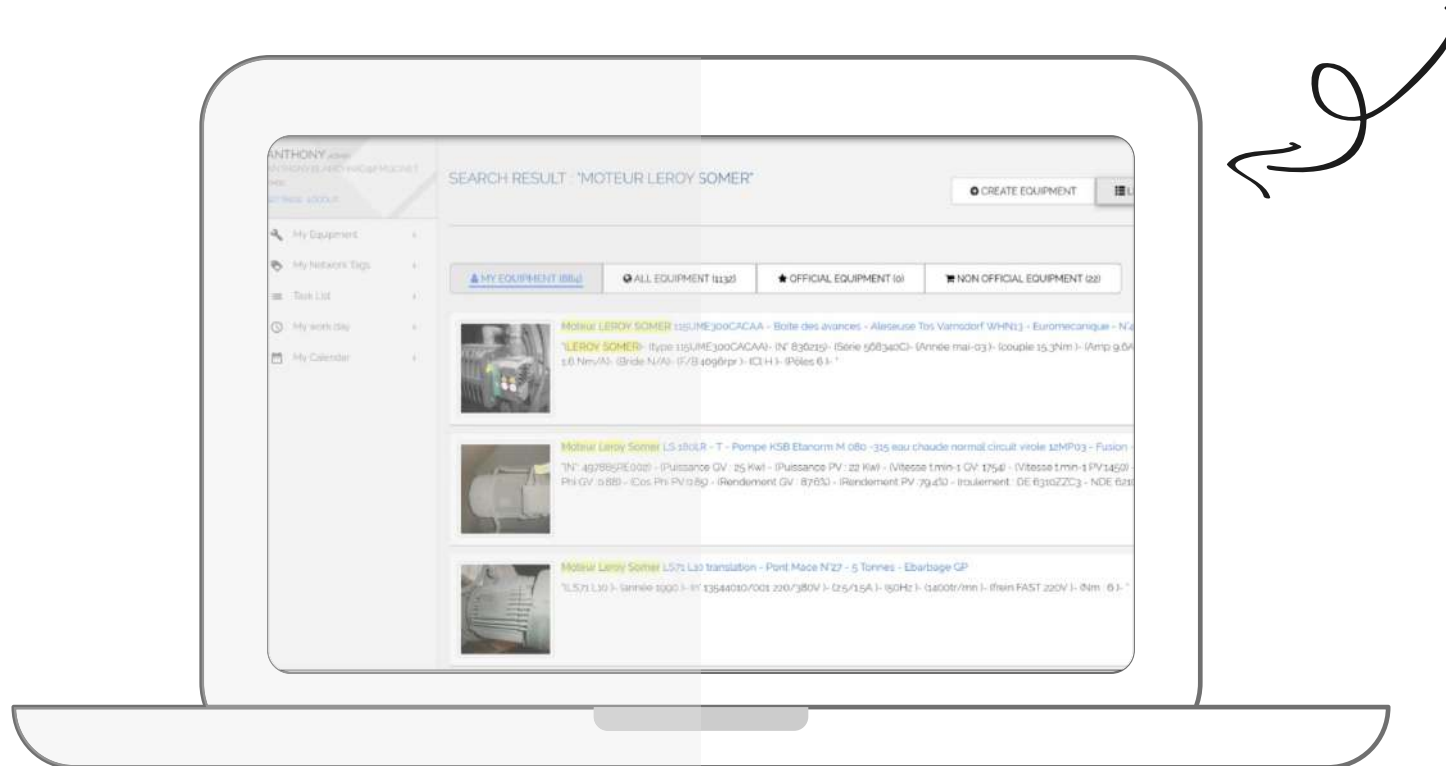

Improve your data analysis with our powerful Big Data tool and cross them easily with other systems (ERP, etc.).

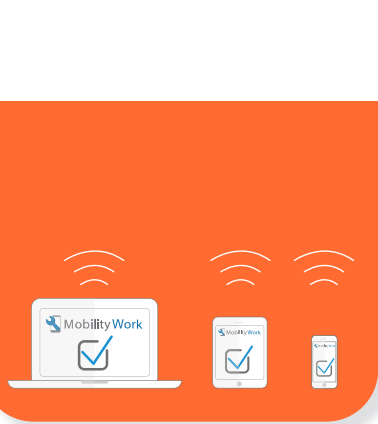

TAKE PART IN THE FIRST MAINTENANCE COMMUNITY

SHARE

Share information, expertise, spare parts and services, and connect with other members facing the same issues on the same machines.

HIGH-TECH ADVANTAGES

No installation required

Hosted in the Cloud, Mobility Work is available on any desktop, tablet or smartphone device, and does not require any training.

Frequent updates

Issues reported by users combined to our development's team expertise enable us to carry out frequent updates adapted to the users' needs.

A precise analysis of your data

With the data analysis algorithm developed by the Mobility Work team, experience a unique data processing and decision-making tool.

ESTIMATED MAIN BENEFITS

(AFTER 6 MONTHS OF USE)

PROBLEMS	MOBILITY WORK SOLUTIONS	BENEFITS
EQUIPMENT ENTRY	2 minutes with Mobility Work vs 1 hour with a classic CMMS software	Example : Plant – 400 Machines 14h vs 400h for a standard CMMS Gain: 386 hours – 48 days
PRODUCTION SHUTDOWN – MAINTENANCE INTERVENTION	Quick access to the machines' history with your smartphone	5% less time spent on an intervention
INTERVENTION PLANNING	Improved intervention management/ planning	10% of the intervention time Gain: 14 h/month/technician
SPARE PARTS INFORMATION	Quick research with the search bar and from your smartphone	6% of the intervention time Gain: 8 h/month/technician
SPARE PARTS STOCK MANAGEMENT	Help to implement the 5S method / automatic resupply / anticipation of the spare part purchase / inventory valuation	10% of the maintenance budget for spare parts
REPORTING	Automatic dynamic reports with the analytics tool	15% of the maintenance manager's time
MAINTENANCE BUDGET / CAPEX	Monitoring of expenditures (workforce / orders / spare parts) – Decision-making: maintain or invest?	3% of your maintenance budget

IMPLEMENTATION AND RUNNING COSTS

PROBLEMS	MOBILITY WORK	STANDARD CMMS
